

COMMUNITY FEEDBACK				
Response Date	Support / Object	Details / Issues	TRIM number	Details
19/06/24	Supportive with other suggestions	Resident is appreciative to the proposed improvements, but questions the stormwater management solutions that are proposed.	D08904655	Reassuring the resident that thorough detailed analysis and calculations have been conducted to ensure the proposal can safely intercept and carry all stormwater flows.
26/06/24	Supportive with other suggestions	Request for extended drainage improvements on the south side	D08911365	Met Mr. X on site on the 15/7/24 and discussed all the concerns he had with the proposed reconstruction. He was reassured that all the works will improve the current conditions and he was happy with the explanation. He expressed gratitude that the project is moving forward.
27/06/2024	Supportive with other suggestions	Against the removal of the two mature trees.	D08914624	Explaining to the resident that trees are in poor health and were inspected and approved by council arborist to be removed. New trees will be planted at the completion of works
2/07/24	Supportive with other suggestions	The resident raises concerns about the proposed road improvements in her area. She highlights issues with the angle of the driveway reconstruction, increased traffic and speeding during school hours, and the need for additional no parking signs at key intersections for safety. Additionally, she requests a reminder for residents about parking rules and nature strip maintenance. She also asks to be kept informed about any access disruptions due to the construction	D08916311	We accommodated the resident and adjusted the driveway angle and added No Stopping signs on both side of the street. We explained that the 40km/h zone is outside Council's jurisdiction. As per illegal parking on nature strip, new kerb and gutter on both side will prevent drivers to do that. As per disruption during the construction, we informed the resident that our workmen will endeavour to minimise disruption and accommodate any site specific access needs.
2/07/2024	Object	Residents find other issues more pressing, therefore are against spending money on this particular project. Also, they believe the reconstruction will increase speeding along Victory Street and make it less safe for pedestrians.	D08915284	We addressed concerns about the Victory Street reconstruction, explaining that the project is a priority due to the road's deteriorating condition and the need for improved drainage. We clarified that funding issues related to Westleigh Park are separate and assures that the Victory Street project will improve road conditions and drainage. The letter also notes that the intersection of Victory Street/Baldwin Avenue is safe based on crash data, but will be monitored for potential future upgrades. Concerns about speeding are directed to NSW Police for enforcement.
20/06/2024	Not applicable	Resident complains about insufficient infrastructure due to new developments	D08905740	Letter forwarded to planning department to respond.
27/06/24	Supportive	General upkeep. Just do it and don't waste time or money.	D08913062	Thanking the resident for the comments and the support.
2/07/2024	Supportive with other suggestions	Requests pedestrian crossings or refuge islands on both sides of Victory Street	D08916259	The Council thanks the resident for their comments regarding the Victory Street road reconstruction and concerns for pedestrian safety. After careful consideration, it was decided not to install a pedestrian crossing due to insufficient pedestrian volumes, which could lead to unsafe situations.
